EXPANDED DESIGN REVIEW

# Make ease of use the impressive part.

Seven structures. The current CoDIN theme. Actual public records from your local app, captured for an independent review.

▶ Public API snapshot · 20 Oct 2026, 9:14 am IST · independent preview

01 / VERTICAL NAVIGATION

## Everything has a place.

A compact record summary and persistent section rail. One selection changes the reading area.

**Best at:** Quick, predictable access to detailed information.

**Consider:** Visitors must choose a section to read beyond the summary.

02 / EXPANDING CARDS

## See the whole. Explore a part.

Preview every section, then expand one into a full-page reading view with its own navigation.

**Best at:** Easy discovery, with a clear return to the overview.

**Consider:** Opening a section adds an interaction.

03 / PROGRAMME DESK

## The details, within reach.

A section index, a generous reading area and a context rail that changes with your task.

**Best at:** Practical facts and next actions stay close to the content.

**Consider:** Three columns need a simpler arrangement on small screens.

04 / OPEN NOTEBOOK

## A story you can navigate.

A continuous sequence of chapters with a sticky contents rail. Read in order or jump directly.

**Best at:** Supports both scanning and uninterrupted reading.

**Consider:** Substantial records make a longer page.

05 / SECTION ATLAS

## A map of what matters.

An editorial mosaic of section previews. Each opens a reading view with a section map.

**Best at:** Shows the breadth and relative emphasis of the page.

**Consider:** Card previews must be useful enough to guide the next click.

06 / CONNECTED WORKSPACE

## Follow the connections.

Search a directory beside the selected record. Move between people or research homes without losing context.

**Best at:** Efficient exploration of connected records.

**Consider:** The preview and full record need distinct links.

07 / ACTIVITY LEDGER

## Follow the work over time.

Published, dated activity sits beside stable information about the work and its people.

**Best at:** Makes recent movement and older work discoverable.

**Consider:** Works best when the team maintains dated updates.

## A shared language. A structure for each job.

### Events ↗

Choose the Programme desk when finding dates, venue and participation details is the primary task.

### Projects ↗

Use the Open notebook to explain purpose, approach and outputs. Choose a ledger when genuine dated updates are maintained.

### Academy & courses ↗

Lead with learning outcomes and the outline. Keep fees and course access nearby.

### Resources ↗

Use searchable records with clear authorship, licence and access links. No resources were returned in this capture.

### Custom learning ↗

Help visitors frame a learning question, then make contact through the existing inquiry route.

### People ↗

Use the Connected workspace for discovery; keep publication search and profile details easy to reach.

### Centres ↗

Use the Section atlas to expose connected projects, people and learning. A workspace helps compare research homes.

### Classroom ↗

Retain a stable lesson outline and reading area; public mockups do not expose private teaching materials.

### About ↗

Use a readable narrative with clear connections to centres, projects and people.

## Try it with a purpose.

1. Find the Andamans event venue and open its map.
2. Find registration fees and the event’s funders.
3. Open a section, move to another and return to the overview.
4. Find a person’s publication by title and year.
5. Follow a centre to a project and an available output.
6. Repeat on a phone, using the keyboard and reduced motion.

Programme desk is the recommended event baseline. Notebook suits project explanations; a ledger is an alternative when dated work is maintained. Atlas suits research homes; workspace suits browsing people.

## Theme

> An Interdisciplinary COnference-cum-Workshop

The Department of Humanities & Social Sciences, IIT Kharagpur is pleased to issue a Call for Papers for an **NPTEL-ICSSR-sponsored Three-Day National Conference and Workshop** titled **"Voices & Traditions: Knowing Andamans through Language & Culture"** to be held from the **3rd to the 5th November, 2026**. There will also be a preconference workshop and hands-on training in **LiFE Suite** for data elicitation and annotation.

The conference wants to bring scholars of linguistics, anthropology, sociology and scholars from other disciplines who are working with the speech communities of Andaman and Nicobar Islands to share their experiences and insights about their research. There will be panel discussions and oral paper presentations. The keynote speaker for the conference is Padma Shree Prof Anvita Abbi. There will be other eminent speakers as well who will be talking about data elicitation, ethical practices of the field and data analysis.

CENTRES

# Centre for Digital Preservation of Linguistic and Cultural Heritage

Our Digital Preservation Centre addresses the urgent threat behind the loss of indigenous records and oral traditions. We deploy localized high-granularity media systems, field-recording standard kits, and custom metadata catalog systems to build durable cultural archives.
